## **The Power of the Jacobs Ladder**

# **Questioning Method in Level 3**

The magic of Jacobs Ladder truly lies in its meticulously crafted questioning sequence. Level 3 continues this tradition, guiding students through a progression of cognitive tasks. Here's a breakdown of the types of thinking students engage with at this level:

## **Level 1: Recall and Identification**

Even at Level 3, there's a foundational step of ensuring students can identify key pieces of information. Questions here might ask students to pinpoint specific facts, identify characters, or recall plot points directly stated in the text. This ensures a solid understanding of the literal meaning.

## **Level 2: Comprehension and Interpretation**

This is where students begin to move beyond simply remembering. Questions at this level require them to interpret meaning, explain concepts in their own words, and understand implied information. For example, they might be asked to explain \*why\* a character made a certain decision or what a particular

metaphor means within the context of the story.

## **Level 3: Application and Inference**

Level 3 questions push students to apply what they've learned. They'll be asked to make inferences about events that aren't explicitly stated, predict future outcomes based on textual evidence, and draw conclusions. This is crucial for developing critical thinking and analytical reading skills. Think about inferring a character's feelings based on their dialogue and actions, or predicting what might happen next in a scientific explanation.

## **Level 4: Analysis and Evaluation**

This is the apex of the Jacobs Ladder questioning process, and Level 3 dedicates significant attention to it. Students are challenged to analyze the text at a deeper level. This could involve:

1. **Evaluating Author's Purpose:** Why did the author write this? What message are they trying to convey?
2. **Analyzing Text Structure:** How does the way the text is organized contribute to its meaning?
3. **Identifying Bias and Perspective:** Whose viewpoint is represented, and are there other

perspectives missing?

4. **Comparing and Contrasting:** How do different ideas or characters relate to each other?
5. **Forming Opinions Based on Evidence:** Students are encouraged to develop their own informed opinions and support them with textual evidence.

The structured questioning ensures that students are not just reading, but actively \*thinking\* about what they read, making **Jacobs Ladder Reading Comprehension Program Level 3** a powerful tool for intellectual growth.
