Understanding the Core Mechanics:

**\*A Game of Thrones: The Card Game\*** is a two-player Living Card Game (LCG). Unlike collectible card games (CCGs), you don't need to buy booster packs to compete; you build your deck from the core set and expansions you purchase. The game revolves around controlling influence and strategic positioning to ultimately defeat your opponent. Each player chooses a Great House to represent—Baratheon, Stark, Lannister, Targaryen, Greyjoy, or Martell – each with its own unique strengths and weaknesses. Every House boasts a distinct playstyle, influencing deck construction and in-game tactics. For example, Lannisters excel at economic control and powerful single-target attacks, while Starks employ strong defensive strategies and powerful synergistic card combinations. Statistics show that Baratheon and

Lannister consistently boast the highest win rates among players, likely attributed to their strong economic and military options. However, skilled players find victory with every house, demonstrating that strategic deck building trumps raw power. A typical game unfolds over several rounds, each composed of several phases: 1. Draw Phase: *Draw a new card.* 2.

Marshaling Phase: **Bring new characters and locations into play.** 3.

Challenges Phase: The heart of the game. Players initiate challenges in military, intrigue, or power, using their characters to win advantages.

Winning challenges earns power, which can be used to activate powerful cards or directly attack your opponent. 4. Dominion Phase: *Gain power based on controlled locations.* 5. Treasury Phase: *Draw gold.*

Mastering the Art of Deck Building: **The key to conquering Westeros lies in crafting a potent deck. Consider these elements:**

- House Selection: **Begin by selecting your House, understanding its innate advantages and playstyle.**
- Card Synergies: **Identify cards that complement each other. Look for combinations that enhance your chosen strategy—e.g., combining numerous cheap military characters with cards that boost their strength.**
- Balance and Consistency: **Ensure your deck maintains balance – avoid over-reliance on specific card types or strategies which can be easily countered.**
- Gold Generation: **Sufficient gold income is crucial for consistent card play and challenging your opponent.**

- Threat Removal: **Include cards that manage your opponent's threats—this includes cards that can kill opposing characters, nullify their actions, or discard key cards.**

Expert players emphasize the importance of iterative deck refinement. Analyzing your gameplay, understanding your weaknesses, and adapting your deck based on experience ultimately boosts win rates.

Strategic Gameplay: Winning the Game: While deck construction forms the foundation, strategic play defines victory. Key elements include:

- Challenge Management: **Smart challenge selection maximizes your gain while minimizing losses. Understanding your opponent's strengths and weaknesses is vital.**

unnecessary actions. • Character Placement: *Placing key characters intelligently on the board grants an advantage. Controlling crucial locations grants power and influence.* • Adaptability: *Responding effectively to your opponent's actions is critical – this is where experience and understanding of different strategies becomes valuable.* • Knowing When to Fold: Recognizing when to concede a challenge or pivot your strategy is crucial to avoid catastrophic losses. Real-World Examples and Expert Opinions: Professional AGOT LCG players consistently emphasize the importance of "threat assessment." Analyzing your opponent's hand, knowing their deck's capabilities, and predicting their actions help you develop countermeasures. availability can be unpredictable and expensive, LCGs offer a more structured and predictable release model. New expansions are released on a regular schedule, ensuring a consistent flow of fresh cards and strategies. This means you can plan your collections and stay competitive without the wild fluctuations of the secondary market.

## Getting Started: What You Need

To begin your journey into the *Game of Thrones: The Card Game*, you'll need a few essential components:

- A Core Set:** This is your entry point. The Core Set provides all the basic rules, a starter deck for each of the major Great Houses (often including Lannister, Stark, Targaryen, Baratheon, Greyjoy, and Martell), and a variety of neutral cards. It's the perfect way to learn the game and get a feel for different playstyles.
- Player Decks:** Once you've mastered the Core Set, you'll want to build your own decks. Each player requires a deck of at least 50 cards. These decks are constructed around a chosen "Lord/Lady" card, which represents your faction leader and dictates certain game effects.
- Plot Deck:** In addition to your main deck, you'll have a separate "Plot Deck" of 6 cards. These Plot cards are revealed each round and provide powerful, often game-changing effects that can dictate the flow of the turn.
- Claim Tokens:** Used to track your progress towards winning the game.
- Gold Tokens:** Represents the currency used to play cards.
- Wood/Stone/Iron Tokens** (for specific mechanics): Some cards and factions utilize these resource tokens.

## The Objective: Claiming the Iron Throne

The ultimate goal in the *Game of Thrones: The Card Game* is to be the first player to accumulate 15 "Strength" points. You earn Strength primarily by successfully completing "Challenges" each round. These challenges represent your attempts to assert dominance, conquer lands, or sway influence within Westeros.

# Understanding the Game's Flow: Rounds and Phases

A game of \*Game of Thrones: The Card Game\* is played over a series of rounds, each divided into distinct phases. Mastering the timing and order of these phases is crucial for success.

## 1. The Claim Phase

This is where the magic of the Plot Deck comes into play. Each player secretly chooses one Plot card from their Plot Deck and places it face down. Simultaneously, all players reveal their chosen Plot cards. The Plot card that is revealed has its effects resolved, and it also determines the "Claim" for the round. \* \*\*Claims:\*\* Each Plot card has a specific claim assigned to it (e.g., "Claim: 1 Strength," "Claim: 1 Power," "Claim: 1 Gold"). This claim is added to the \*first\* successful Challenge of that type initiated by the player who controls that Plot. For instance, if your Plot card has "Claim: 1 Strength," and you are the first to win a Military Challenge this round, you immediately gain 1 Strength. This is a crucial element for victory.

## 2. The Draw Phase

After the Claim Phase, each player draws one card from their main deck. You'll begin the game with a hand of 7 cards.

## 3. The Dagger Phase

This is where your characters come into play. Players simultaneously reveal characters from their hand and pay their "Cost" using Gold tokens. Characters are then placed on the table in your "Play Area." \* \*\*Costs:\*\* Every card in the game has a Gold cost associated with it. This cost must be paid from your available Gold pool to play the card. \* \*\*Icons:\*\* Characters, locations, and attachments often have various icons representing their strengths and abilities. The most important icons for challenges are: \*

**\*\*Strength Icon (Sword):\*\*** Used to win challenges. **\*\*Influence Icon (Scroll):\*\*** Used to win challenges. **\*\*Power Icon (Shield):\*\*** Used to win challenges. **\*\*Intrigue Icon (Eye):\*\*** Used to win challenges. **\*\*Military Icon (Hammer):\*\*** Used to win challenges.

#### 4. The Stand Phase

In this phase, you get to "Stand Up" all of your cards that were "Tapped" (turned sideways) in previous turns. Tapping a card often represents using its abilities, participating in challenges, or moving to a location.

#### 5. The Challenge Phase

This is the heart of the game. Players take turns initiating "Challenges." A Challenge is a contest of strength between your characters and your opponent's characters. There are five distinct types of challenges: **\*\*Military Challenge:\*\*** A direct test of martial prowess. **\*\*Intrigue Challenge:\*\*** A battle of wits and espionage. **\*\*Power Challenge:\*\*** A struggle for political sway and influence. **\*\*The Long Winter Challenge (specific to certain factions/expansions):\*\*** Represents the threat of the White Walkers or other environmental hazards. **\*\*The Rains of Castamere Challenge (specific to certain factions/expansions):\*\*** Often a more disruptive or devastating challenge. To initiate a Challenge, you must select one of your characters and declare the type of challenge you are initiating. Your opponent then has the opportunity to defend by selecting one or more of their characters to participate in the defense. **\*\*Winning a Challenge:\*\*** To win a Challenge, the total "Strength" value of your participating characters must be greater than the total "Strength" value of your opponent's defending characters. Icons are added up to determine the total Strength for the challenge. If you win a Challenge, you gain rewards as indicated by the Plot card's Claim (if it's the first successful challenge of that type) and potentially other card effects.

## 6. The Marshaling Phase

In this phase, you gain Gold equal to the "Gold Icon" on your revealed Plot card. You also have the opportunity to play cards from your hand, pay their costs, and add them to your play area. This is a good time to reinforce your board with new characters or attachments.

## 7. The Dusk Phase

The round concludes with the Dusk Phase. Any effects that last "until the end of the round" expire. You then discard down to your hand size limit (usually 7 cards, but can be affected by card effects).

# Key Concepts and Terminology

To truly master the \*Game of Thrones: The Card Game\*, understanding its unique terminology is essential. \* **Characters:** The backbone of your strategy. They have Strength, cost, and often special abilities. \*

\* **Locations:** Provide ongoing effects and can often be used to generate Gold or recruit characters. \* **Attachments:** Cards that attach to

characters, locations, or even plots to modify their abilities or provide new ones. \* **Events:** One-time use cards that have immediate effects. \*

\* **Tapping:** Turning a card sideways to indicate it has been used or is no longer available for certain actions. \* **Keywords:** Many cards have

special keywords that grant them unique abilities (e.g., "Stealth,"

"Renown," "Fearsome," "Westeros"). \* **Icons:** The symbols on cards that represent their attributes and capabilities. \* **Summoning:** Playing a card

from your hand into your play area. \* **Discarding:** Moving cards from your hand or play area to your discard pile. \* **Mulligan:** The option to

redraw your starting hand if you are unhappy with it.

# Building Your Deck: The Art of Strategy

Deckbuilding is where your creativity and strategic thinking truly shine. A well-constructed deck is the foundation of a winning strategy. Here are some key considerations:

- \* **Chosen Lord/Lady:** This card sets the tone for your deck and often provides powerful benefits for specific factions.
- \* **Synergy:** Look for cards that work well together. For example, a card that buffs "House Stark" characters will be more effective in a Stark-focused deck.
- \* **Balance:** Aim for a good balance of characters, attachments, events, and plots. You need characters to fight, attachments to enhance them, and plots to drive your strategy.
- \* **Cost Curve:** Ensure your deck has a good distribution of card costs. Too many high-cost cards will leave you with nothing to play early in the game, while too many low-cost cards might lack late-game impact.
- \* **Targeted Strategy:** What is your deck trying to achieve? Are you aiming for a swift victory through aggressive challenges, a slow grind through resource denial, or a combination of both?

## Navigating the Factions

Each of the Great Houses in Westeros has its own unique playstyle and strengths, making the game incredibly diverse.

- \* **House Lannister:** Masters of wealth and manipulation. They excel at accumulating Gold, controlling the board through card effects, and often have powerful characters that gain strength based on their Gold.
- \* **House Stark:** Known for their resilience and strong characters. They often have abilities that trigger when defending or when their characters are in play. Their strength lies in their steadfastness.
- \* **House Targaryen:** The dragonlords. They have powerful, expensive characters with devastating abilities. They excel at controlling the board with dragons and can often recover from setbacks.
- \* **House Baratheon:** Renowned for their military might and aggressive playstyle. They excel at winning challenges and often have abilities that reward them for doing so.
- \* **House Greyjoy:** The ironborn. They are known for their naval prowess and their ability to disrupt opponents. They

often have unique mechanics that involve discarding cards or returning cards to hand. **House Martell:** The vipers of Dorne. They are known for their cunning and their ability to turn the tables on their opponents. They often have abilities that trigger when they are targeted or when their cards are returned to hand. There are also other factions and alliances that have been introduced through expansions, adding even more depth and complexity to the game.

However, Renown isn't the only path to victory. This dual victory condition allows for diverse strategies, catering to both aggressive and more subtle playstyles.

# Essential Terminology for Aspiring Lords and Ladies

Before diving into the mechanics, it's crucial to familiarize yourself with some key terms that will be frequently encountered:

1. **Player Deck (or Main Deck):** This is the primary deck of cards you'll draw from throughout the game. It must contain a minimum of 60 cards, with no more than three copies of any single card (with some exceptions for legendary characters).
2. **Plot Deck:** A separate deck of seven cards that dictates the unique effects and benefits available to you each round. You choose one Plot card to reveal each round, impacting your strategy and offering powerful advantages.
3. **Attachment:** Cards that modify or enhance characters or locations. These can represent weapons, titles, or even magical boons.
4. **Event:** One-time use cards that trigger immediate effects, often disrupting opponents or providing a crucial advantage.

9. **Influence:** A numerical value representing a character's ability to win Power challenges.
10. **Cost:** The amount of gold required to play a card from your hand.
11. **Gold:** The currency used to pay for cards. You gain a set amount of gold each round, which is crucial for deploying your forces.

resource you protect and deplete from your opponents.

13. **Discard Pile:** Where used cards and defeated characters go.
14. **Dead Pile:** A special area for cards that are removed from the game entirely, often due to specific card effects.

## The Anatomy of a Game Turn: A Round-by-Round Breakdown

*A Game of Thrones: The Card Game* is played over a series of rounds, each consisting of several distinct phases. Understanding this turn structure is fundamental to successful gameplay. Here's a breakdown of a typical round:

### 1. Draw Phase

At the start of each round, you draw one card from your Player Deck. This replenishes your hand and provides new options for your strategy. Simultaneously, you reveal the top card of your Plot Deck. This card's effects will be active for the entire round, influencing various aspects of gameplay, from gold gained to the strength of challenges.

### 2. marshal Phase

This is where you bring your forces to bear. You can play any number of cards from your hand, provided you have enough gold to pay their costs. Characters, locations, attachments, and events are all deployed during this phase. The order in which you play cards can be crucial, as some cards have effects that trigger when they are played or when other cards enter play.

### 3. Action Phase

The heart of the round, where the strategic maneuvering truly begins. Players take turns performing one action at a time, alternating until both players pass consecutively. Available actions include:

1. **Initiating a Challenge:** Declare an attack on your opponent. Challenges are categorized as either Military, Intrigue, or Power. The type of challenge dictates what kind of effects are activated and how Renown can be gained.
2. **Playing an Event Card:** Trigger the immediate effect of an Event card from your hand.
3. **Activating a Card Ability:** Many cards have unique abilities that can be triggered by paying a cost (often gold or tapping the card).
4. **Passing:** Choose to take no further actions this turn.

Once both players pass consecutively, the Action Phase ends.

### 4. Resolution Phase

After the Action Phase concludes, all initiated challenges are resolved. The strength of the attacking and defending characters, along with any modifiers from attachments or card abilities, are compared. The winner of the challenge gains the benefits associated with it, such as Renown from a Power challenge, or infamy and card draw from an Intrigue challenge. Military challenges often result in the losing player discarding cards or losing characters.

### 5. Stand Phase

All cards that were "tapped" (turned sideways to indicate they have been used for an action or challenge) during the round are now untapped and ready to be used again in the next round. This signifies a reset, allowing your forces to prepare for new conflicts.

## 6. House Phase

In this final phase, players gain gold based on their revealed Plot card and the number of controlled locations. Any end-of-round effects trigger here, and players check for victory conditions. If no one has won, a new round begins.

## The Pillars of Warfare: Understanding Challenges

Challenges are the engine that drives *A Game of Thrones: The Card Game*. They are the primary means of interacting with your opponent and progressing towards victory. Each challenge type has distinct objectives and consequences:

### Military Challenges

These are straightforward contests of might. Military challenges are used to overwhelm your opponent's forces, potentially forcing them to discard cards from their hand or even lose characters from play. Successfully winning a Military challenge often results in your opponent losing Power, pushing you closer to depleting their resources.

### Intrigue Challenges

Intrigue challenges represent the cunning and espionage that permeates Westeros. Winning an Intrigue challenge typically allows you to draw more cards, giving you a greater hand advantage, or to look at your opponent's hand and potentially disrupt their plans. They are a key way to maintain momentum and outmaneuver your opponents strategically.

## Power Challenges

As mentioned earlier, Power challenges are directly tied to the victory condition. Successfully winning a Power challenge earns you Renown. The number of Renown points you gain is determined by the Influence value of the characters involved in the challenge, after all modifiers are applied. This makes accumulating powerful characters with high Influence a critical strategy for victory.

## Deckbuilding: Crafting Your Path to the Iron Throne

The strategic depth of *A Game of Thrones: The Card Game* truly shines in deckbuilding. A well-crafted deck is essential for success. When constructing your Player Deck, consider the following:

### Choosing Your Great House

Each Great House has its own unique strengths, weaknesses, and playstyle. For example, the Lannisters are known for their wealth and political manipulation, while the Targaryens excel at overwhelming opponents with dragonfire and powerful character abilities. Your chosen House will heavily influence the types of cards you'll want to include.

### Synergy and Card Combos

The most powerful decks are built around synergistic card combinations. Look for cards that complement each other's abilities, creating powerful combos that can swing the tide of battle. For instance, a card that buffs character strength might work exceptionally well with characters who excel in Military challenges.

## The Plot Deck Strategy

Your Plot Deck is just as important as your Player Deck. Each of the seven Plot cards offers a unique advantage for the round in which it's revealed. Strategically choosing which Plot to reveal each round can drastically alter your game plan and exploit your opponent's weaknesses. Some Plots offer more gold, others provide defensive bonuses, and some even allow for extra actions.

## Balance is Key

A good deck needs a balance of characters, attachments, events, and locations. You need enough characters to engage in challenges, enough attachments to enhance them, and enough events and locations to provide support and disrupt your opponent. Ensure you have a solid curve of card costs so you can consistently play cards throughout the game.

## Advanced Strategies and Tips for Success

Once you've grasped the basics, consider these advanced strategies to elevate your gameplay:

1. **Card Advantage:** Maintaining a strong hand size is crucial. Focus on cards and abilities that allow you to draw more cards or force your opponent to discard.
2. **Tempo Control:** Dictate the pace of the game. By forcing your opponent into unfavorable situations or limiting their ability to play key cards, you can gain a significant advantage.
3. **Threat Assessment:** Constantly evaluate your opponent's board state and hand. Identify their most dangerous cards and threats, and prioritize neutralizing them.

4. **Bluffing and Misdirection:** Like the characters in the show, you can use misdirection to your advantage. Sometimes, feigning a strong hand or a particular strategy can lead your opponent to make crucial mistakes.
5. **Adaptability:** The metagame of any card game is constantly evolving. Be prepared to adapt your deck and strategies based on new card releases and the strategies of other players.

|----|---------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1  | I'm brand new to A Game of Thrones: The Card Game (LCG). What's the absolute first thing I need to know to start playing? | The core concept is to defeat your opponent by accumulating 15 power on your "power" or "prestige" track. You do this by winning challenges, primarily attacking your opponent's "strength" value. It's a strategic battle of wits and resource management.                  |
| 2  | What are the essential components of a Game of Thrones LCG deck?                                                          | A standard deck consists of exactly 60 cards. This includes a faction card (representing your chosen house), a plot deck (usually 6 cards) that dictates your income and special abilities each round, and your main deck of characters, attachments, events, and locations. |

|   |                                                                                  |                                                                                                                                                                                                                                                                                                                                                             |
|---|----------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 3 | How do I actually win a turn in Game of Thrones LCG? What's the flow of a round? | Each round has several phases: Standby (draw cards, reset board), Reign (play cards, start challenges), Dominance (determine who gets the Dominance token), and Dusk (cleanup, discard down to hand size). The most crucial part is the Reign phase where you play cards and initiate challenges.                                                           |
| 4 | I see a lot of symbols on the cards. What do 'Strength' and 'Influence' mean?    | 'Strength' is the value your characters contribute to challenges. If your total strength exceeds your opponent's, you win the challenge. 'Influence' is used to claim the "Prestige" token in the Dominance phase, which grants benefits for the next round.                                                                                                |
| 5 | What are 'Challenges' and how do I win them?                                     | Challenges are the primary way to advance your game. You can initiate three types: Military (targets opponent's military strength), Intrigue (targets opponent's intrigue strength), and Power (targets opponent's power on the board). You win by having higher total strength in that category than your opponent, after accounting for any card effects. |
| 6 | Are there different types of cards I should know about?                          | Yes! You'll primarily encounter Characters (your fighters and agents), Attachments (modify characters or locations), Events (one-time powerful effects), and Locations (provide ongoing benefits or strategic points).                                                                                                                                      |
| 7 | What's the deal with 'Gold' and how do I get more to play cards?                 | Gold is your primary resource. You gain Gold each round based on your Plot card and potentially from card effects. You spend Gold to play most cards from your hand. Managing your Gold effectively is key to executing your strategy.                                                                                                                      |

|   |                                                                                  |                                                                                                                                                                                                                                                                                          |
|---|----------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 8 | I've heard about 'factions.' How do I choose one, and what makes them different? | Factions represent the Great Houses of Westeros (e.g., Stark, Lannister, Targaryen). Each faction has unique strengths, weaknesses, and playstyles dictated by their faction card and the cards available to them. Choosing a faction that resonates with you is a great starting point. |
| 9 | What are the 'Plot Decks' and why are they important?                            | Your Plot Deck determines your income (Gold), card draw, and special abilities each round. At the start of each round, you choose one Plot card to reveal, activating its effects. Strategically choosing which Plot to play and when is crucial for controlling the flow of the game.   |
